Back End
Node.js, Express.js, PHP, MySQL

PROJECTS

eBooks Shop   (November 02, 2022 - January 29, 2023)
Online eCommerce

A virtual bookstore offering a seamless shopping experience for book lovers. To access the store's vast collection and make purchases, users must first create an account and log in with their unique credentials.

- Design optimized for seamless compatibility across all devices.
- Advanced book search platform enabling users to easily locate their desired books by applying various filters.
- A comprehensive admin panel that grants full control of the website to the administrator, including the ability to add new books or categories, manage registered users by accessing their account information and history purchases.
